

# Dome Climber

2018 PRODUCT SHEET

Freestanding Dome Climber with Orbs

## Dome Climbers

This revolutionary leap forward in dome climbers opens up new play experiences to more people than ever before. A hybrid dome/orbs structure provides a more challenging climb than ordinary dome climbers. For the first time, its open design also enables children with mobility devices, parents and caregivers to go inside the dome to enjoy closer interaction as they play together. Available as both a freestanding structure or a modular deck component, the new Miracle Dome Climber with Orbs has everything you need to make dome climbers more exciting than ever.

<b>Product Number:</b>	455-1
<b>Description:</b>	Dome Climber with Orbs Freestanding
