

TAKING THRILL TO NEW HEIGHTS

Extreme Generation is a towering adventure playground with challenging physical events for children seeking extreme play! Its design brings play to new heights, with innovative, fully-enclosed skyways that provide elaborate rope course-inspired activities far above ground—adding an element of perceived risk to any play space.

EXTREME GENERATION SYSTEM DETAILS

From skyscraping pinnacles nearly 30' in the sky, the new Extreme Generation towers provide a variety of challenging climbing paths for children looking to climb to new heights.

XG HEXAGON HUB WITH CENTER CLIMB

Aptly named the "Hub," the Hexagon Hub can be the star of any play system, serving as a link to both XGEN and non-XGEN Miracle play equipment. An integrated vertical center climber connects the two-level deck structure.

Overall Height with Disc Roof: 26.5'

Deck height: 12'

XG ADA TOWER

The largest XGEN tower lets kids choose the challenge of their ascent with two parallel play paths. A spiraling pathway of platforms provides a quick way to the top, while a central rope climber tests strength and balance.

Overall Height with ADA Roof: 28.5'

Deck height: 12' & 16'

XG HURRICANE TOWER

Adventurers can climb up this XGEN tower together using these colorful, suspended rings, which provide a dynamically challenging and active climb.

Overall Height with Disc Roof: 26.5'

Deck height: 12'

XG QUAD CENTER STAGE TOWER

It might be the smallest XGEN tower, but there's plenty of room for thrilling activities. The distinctive single pedestal design provides additional visibility to an XGEN structure.

Overall Height with Disc Roof: 24.5'

Deck height: 12'

XG HEX CENTER STAGE TOWER

A massive central pedestal iconic to Miracle provides a natural gathering space for kids to take in the view, while adding visibility and a striking silhouette to the XGEN structure.

Overall Height with Disc Roof: 26.5'

Deck height: 12'

* Renderings shown are for visual representation only. Additional components and/or enclosures are required to make towers compliant.

EXTREME GENERATION SKYWAYS

Push the limits of play into the sky for an unforgettable aerial adventure! With activities inspired by rope courses, Extreme Generation's cutting-edge, enclosed skyways provide a breathtaking effect while keeping children safe.

HIVE SKYWAY

Geometry has never been so fun! Suspended 2D hexagonal shapes provide an interesting climbing experience, challenging kids to plan and navigate in order to reach their destination.

CIRCLES SKYWAY

Children test their balance and coordination as they traverse the rocking and spinning circles, swaying high above the ground.

BELTS SKYWAY

Flexible, soft rubber belts add an elastic element and dynamic challenge to this stimulating skyway path, giving an impression that you're walking on the clouds.

*All skyways are 20' long and access XGEN Towers at a 12' deck height.

EXTREME GENERATION COMPONENTS

SLIDES

The excitement doesn't end once you've reached the top of an Extreme Generation system! With some of the tallest and longest enclosed slides in the industry, you can amp up the thrill by adding one to any of our XGEN towers.

TUFF-NET PANELS

Unique to the outdoor play industry, Tuff-Net panels are used throughout Extreme Generation products to provide visibility and the feeling of openness while keeping users completely enclosed and safe from falling as they explore extreme heights.

ROOF DESIGNS

Extreme Generation roofs perform double duty—providing shade over the XGEN towers while adding a strikingly modern aesthetic appeal. Towering high above the playground, these distinctive roofs are sure to make a statement.
