

Tranquility Corner

MIRACLE® MUSEUM™

Miracle Museum's Tranquility Corner provides a soothing space for children who might be overstimulated by busy playgrounds. Colorful features provide a focal point that becomes a retreat for children if play becomes overwhelming, without having to leave the playground. Tranquility Corner gives families of varying needs and abilities the chance to play together and play longer, without fear of too much stimulation pushing a child over the edge. It provides good lines of sight as well as a tactile calming experience for a child. Any two Tots' Choice Expansion below-deck panels can be used in Tranquility Corner's frame. The roof panel is a colored polycarbonate that is available in 6 colors: red, orange, yellow, green, blue, and purple.

Shown with Textured Triangle Hexagon and Star Circle Perforated Panels.

Material Specifications

Roof Weldment shall be made of 3-1/2" O.D. x 11 gauge galvanized tube, 2-3/8" O.D. x 12 gauge galvanized tube, and 11 gauge galvanized sheet steel. Post shall be made of 3-1/2" O.D. x 11 gauge galvanized tube. The roof panel shall be constructed of translucent colored polycarbonate. All fastening hardware shall be Fastener Style A. The frame shall have a Mira-Cote finish.

* Tranquility Corner requires two Tots' Choice Expansion (TCX) below deck panels. Capacity varies based on panels chosen.

Soothing Retreat

Provides a soothing space for children who might be overstimulated by busy playgrounds

Perforated Sensory Panels

Colorful features provide a focal point that calms overwhelmed children

Skylight

The colorful roof and the shape panels support a science lesson on daylight illumination on horizontal, vertical, and sloping surfaces. A teacher can create multiple lesson plans including:

- Sun illumination comparisons of roof and panels during different weather conditions (e.g., sunny, cloudy, rainy)
- Sun illumination comparisons between the roof and the panels, and sun illumination on the equipment's roof and panels during different times of the school year (e.g., fall, spring, winter).

Large Openings

Provide great lines of sight for supervision
